

Partnering ActivInspire with Boardworks will help you make the best use of your classroom technology and teach inspirational classes. Here's how:

Linking to a Boardworks presentation

Boardworks presentations can be easily linked to your ActivInspire flipchart. Just follow these simple steps:

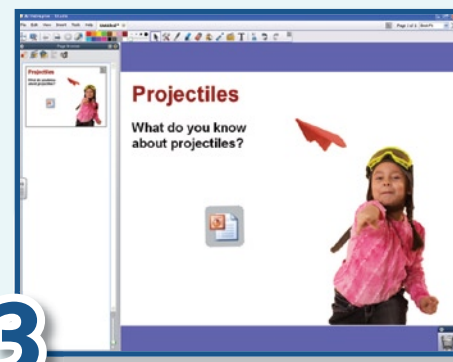

1

Click on Insert > Media.

2

Navigate to and choose the Boardworks presentation you want to link to.

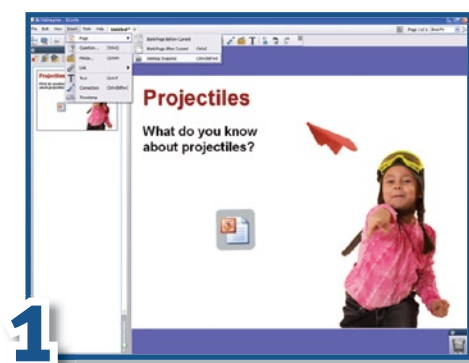

3

A PowerPoint icon will appear in your flipchart. You can resize, rotate or move this to where you want it. Pressing on this icon will instantly launch the Boardworks presentation.

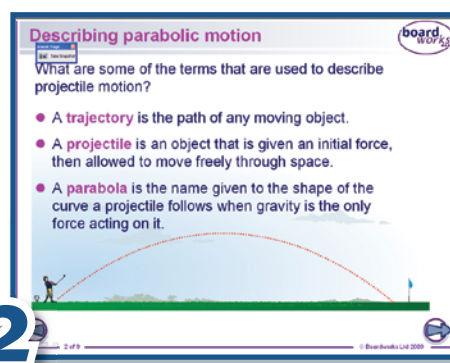

Importing images of slides from a Boardworks presentation

You can also insert images of the non-interactive slides from Boardworks presentations into your flipchart by following these steps:

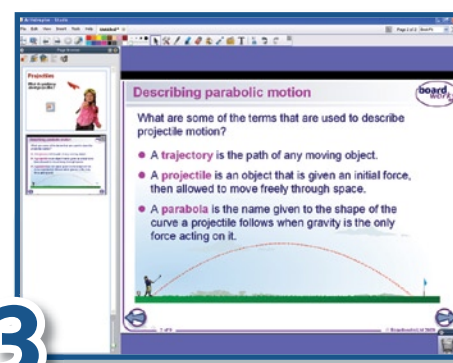

1

Click on Insert > Page > Desktop Snapshot.

2

Open the Boardworks presentation and view the slide in slideshow mode.

3

Press on the camera in the pop-up window. The slide will automatically be inserted in your flipchart as a new page.

Importing a whole Boardworks presentation as images

We don't recommend this as you'll miss out on our great Flash and PowerPoint interactivity.
